SINGAPORE INTERNATIONAL 3D Printing Competitions

Jewellery 3D Printing Competition

Vanda Miss Joaquim, a hybrid orchid cultivar, is Singapore's national flower. For her vibrant colour, hardiness, resilience and year round blooming qualities, she was chosen in 1981 to represent Singapore's uniqueness and hybrid culture. In this 3D printing competition, we are looking for orchid-inspired jewellery pieces that are distinctive and pleasurable to wear.

Architecture 3D Printing Competition

Looking into the future, innovative technological solutions are needed to increase Singapore's land capacity for longer-term development needs, providing options for the future generations. In this 3D printing competition, we seek designs for creative and new urban architecture for underground or between high-rise buildings. The architecture can be for dwelling, leisure or business purposes.

Eligibility

Open category -

All, regardless of age, gender, nationality etc.

TOP PRIZE
S\$10000 cash
